ATTENTION: Kitselas Community

Dear Sir/Madam:

**RE: Eulochan Fishing Season 2016**

The Eulochan fishing season is fast approaching. The Kitselas Lands & Resources office is looking to start the eulochan monitoring on February 15, 2016, the season should go to the end of March. This is also pending on how much ice is on the Skeena River. There are numerous spots to fish and we as Kitselas normally fish between Kasiks to the Khyex Rivers. You will need your status card and Fish designation card while fishing; gear types are either dip net or gill-net. For safety reasons please have hi-vis clothing or a life jacket. Although it is not enforced, safety protection is recommended for community member safety.

Eulochan monitors are out there for catch data so please submit any catch data to them or call in your catch data to the Kitselas Lands & Resources Dept. 778-634-3517

Any questions or concerns please contact myself or Crystal Wright at the Lands & Resources office or by email [k.mcdamesjr@kitselas.com](mailto:k.mcdamesjr@kitselas.com) or [kitselasfieldtech@kitselas.com](mailto:kitselasfieldtech@kitselas.com)

Sincerely,

Ken McDames Jr  
Sr. Resource Officer  
Kitselas Lands & Resources Dept.
